

Our Environment Policy at The Manly Hotel

The Manly Hotel is a Queensland company with a commitment to responsible tourism and eco-efficiency.

In today's climate it is important we all do our small part for a brighter and longer global future. That is why here at The Manly Hotel we are proud ecoBiz partners. This means we have structured eco-efficiency measures not only to ensure we meet best practice in energy, water and material use, but, also gain productivity and keep costs to a minimum.

The Seven Principles of Eco-efficiency*:

1. **Reduce** the material intensity of goods and services
(make more stuff with fewer inputs)
2. **Reduce** the energy intensity of goods and services
(make more stuff with less energy)
3. **Reduce** the dispersion of any toxic substances
(make more stuff with less poisonous waste)
4. **Enhance** the recyclability of materials
(make the stuff recyclable)
5. **Maximise** sustainable use of renewable resources
(make stuff out of stuff that won't run out)
6. **Extend** the durability of products
(make stuff that lasts)
7. **Increase** the service intensity of goods and services
(meet demand with a service and not with stuff)

Eco-friendly Practices Taking Place:

1. **Water tanks for the watering of plants and gardens**
2. **Recycling of glass, aluminium, paper and toner cartridges**
3. **Waterless urinals**
4. **Passive cooling**
5. **"Say No To Plastic Bags" programme**
